

Product Specification Sheet

DEFCON® VPKL

Part #: PA496E

Product Description:

The DEFCON® Video Port Key Lock (VPKL) is the only system that combines a galvanized steel cable with a high quality key lock and is designed to fit the video port of any desktop/notebook computer. Simply secure your computer to an immovable object and your DEFCON® VPKL will deter thieves from trying to steal it. The DEFCON® VPKL utilises a specially designed pass through video cable to allow the use of your monitor/projector while the DEFCON® VPKL is secured. The DEFCON® VPKL's unique lock design makes this product truly one of the toughest and strongest locks out in the market place.

Product Features and Specifications:

- One of the toughest and strongest security locking devices out in the market place
- Attaches securely to the video port of all desktop/notebook computers
- Pass-through video port cable design allows access to monitor/projector
- 2 sets of keys
